Blanket

must have

EN The lamp resembles fabric in texture but it has been enlarged to a giant scale. The "warp" is made of folded aluminum tubes and the "weft" is made of thick wool fortified with foam. This over-scaled lighting design has been specially chosen to allow for the division of optical and acoustic space. At the same time, it does not close the space completely, because it is openwork. When dimmed, it can be used to provide mood lighting in spaces for relaxing.

Quickinfo

size	M ■ 02	XL ■ 04
